BioDrop CLI

The project was renamed from LinkFree CLI to BioDrop CLI (please update your local git clones with the new remote name)

BioDrop CLI is a command line tool that helps us to create and update your [BioDrop](#) profile through CLI. We can also give testimonials and add events through it.

[NPM Package](#) [passing](#) [Releases](#) [passing](#) [downloads](#) [2.9K](#)

Features

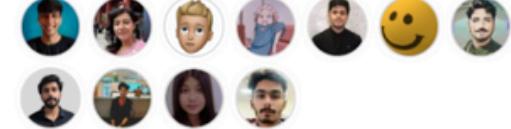

- Creating a BioDrop profile.
- Searching for a BioDrop profile.
- Updating an existing BioDrop profile.
- Giving a testimonial to a BioDrop profile.
- Adding events (conferences, meetups, etc).

Using the CLI tool

JavaScript

Star

JavaScript (JS) is a lightweight interpreted or JIT-compiled programming language with first-class functions. While it is most well-known as the scripting language for Web pages, many non-browser environments also use it, such as Node.js, Apache CouchDB and Adobe Acrobat. JavaScript is a prototype-based, multi-paradigm, dynamic language, supporting object-oriented, imperative, and declarative (e.g. functional programming) styles.

Security Policy

The screenshot shows the GitHub Issues page for the repository "Pradumnasaraf / candy". The "Issues" tab is selected, showing 1 issue. The main content area displays several reporting templates:

- Bug**: Report an issue to help improve the project. [Get started](#)
- Documentation issue**: Found an issue in the documentation? You can use this one! [Get started](#)
- General Feature Request**: Have a new idea/feature? Please suggest! [Get started](#)
- Other**: Use this for any other issues. Please do NOT create blank issues [Get started](#)
- Report a security vulnerability**: Please review our [security policy](#) for more details. [View policy](#)

At the bottom, there is a link "Don't see your issue here? [Open a blank issue.](#)" and a "Edit templates" button.

Footer: © 2024 GitHub, Inc. [Terms](#) [Privacy](#) [Security](#) [Status](#) [Docs](#) [Contact](#) [Manage cookies](#) [Do not share my personal information](#)

The screenshot shows the GitHub Security page for the repository "Pradumnasaraf / candy". The "Security" tab is selected. On the left, there is a sidebar with the following options:

- Overview
- Reporting
- Policy** (selected)
- Advisories
- Vulnerability alerts
- Dependabot
- Code scanning
- Secret scanning

The main content area is titled "SECURITY.md" and contains the following text:

Reporting a Vulnerability

Please don't raise an issue that can be more vulnerable to put out in public. Instead, report via <http://pradumnasaraf.dev/contact>.

Cloud Development Environment (CDE) & Docker Compose

/api/devtip	Creates a new dev tip.	POST
/api/devtip/:id	Updates a dev tip.	PATCH
/api/devtip/:id	Deletes a dev tip.	DELETE

Developing the API

This section includes how to test and develop API at your end. You can either run it in the cloud using **Gitpod** or run it inside a container using **docker** or choose to set up the complete environment locally.

GitPod

 [Open in Gitpod](#)

Docker Compose

Prerequisites - Docker and Compose installed in your local system.

You can run below command and you can access the API at `localhost:9009`

```
docker compose up
```

Local setup

Prerequisites- Node.js installed and a Mongo server on your localhost.

Make sure you have installed all the dependencies and you have a MongoDB server running on your local machine. Also, make sure are in the root directory of the project.

Step 1: Copy `.env.example` to `.env`.

```
npm run env
```

Automation

- GitHub Actions

The issue seems to be installing playwright, when I run `npx playwright install --with-deps` I'm getting the error "failed to install browsers" I'm on ubuntu.

@VICTOR142 The issue seems to be installing playwright, when I run `npx playwright install --with-deps` I'm getting the error "failed to install browsers" I'm on ubuntu.

Eddie Jaoude | EddieHub 02/25/2024 6:22 PM
oh I see, hmm i am not sure because i am on mac, you might need to google the error and check the playwright docs for ubuntu - you might need a system wide dependency

VICTOR142 02/25/2024 6:31 PM
Yeah the issue is with installing dependencies, I ran it without `--with-deps`. it installed the browsers. but still gives the same error. I'll look into it and get it fixed. Thanks for the help .

In PR I made (<https://github.com/EddieHubCommunity/BioDrop/pull/9929>). we have a failing test case related to accessibility. the error arises as we are not keeping the mastodon link visible and accessible. But we intend on keeping it invisible and inaccessible to users, it's meant only for mastodon to verify users biodrop profiles. So Is there a way to avoid the error and keep the link inaccessible for users.

GitHub Build software better, together
GitHub is where people build software. More than 100 million people use GitHub to discover, fork, and contribute to over 420 million projects.

...

LinkFree CLI v2.0.0 is out 🎉

Now from the CLI, you can:

- Create a profile (Will all the latest features on LinkFree).
- Update profile.
- Give a testimonial.
- Add events.

Huge shoutout to [@Ananya_codes](#) for collaborating with me and making this possible.

```
① ✘ LinkFree-CLI git:(CLI) ✘ npx linkfree-cli
> linkfree-cli@2.0.0 start
> node src/index.js

Welcome to LinkFree CLI! Let's get started.
✓ Choose one option (Press down arrow to traverse the list) · Create a LinkFree JSON file
✓ What is your GitHub username? (case sensitive) · PradumnaSaraf
✓ What is your name (e.g. Jone Doe)? · Pradumna Saraf
✓ Your profile type? · Personal
? Add a short bio about yourself · Open Source fa█
```

 1.4.14

 5cfaee4 

Compare ▾

1.4.14

What's Changed

- Add console hostname env variable by [@TorstenDittmann](#) in [#7360](#)
- Add more phone validation by [@loks0n](#) in [#7165](#)

Fixes

- Migrate enum attribute size to 255 by [@fanatic75](#) in [#7183](#)
- Fix SMS import by [@stnguyen90](#) in [#7293](#)
- Fix app console hostnames check by [@stnguyen90](#) in [#7385](#)
- Fix webp compression by [@abnegate](#) in [#7566](#)

Miscellaneous

- Update console by [@christyjacob4](#) in [#7291](#)
- Escape function build command by [@abnegate](#) in [#7816](#)

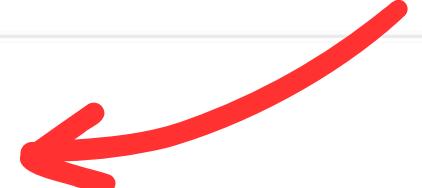

Note: please run the [migrate command](#) even if upgrading from 1.4.x.

Full Changelog: [1.4.13...1.4.14](#)

Pradumna Saraf @pradumna_saraf · Sep 14, 2023

I always get this common question about where to learn GitHub Actions.

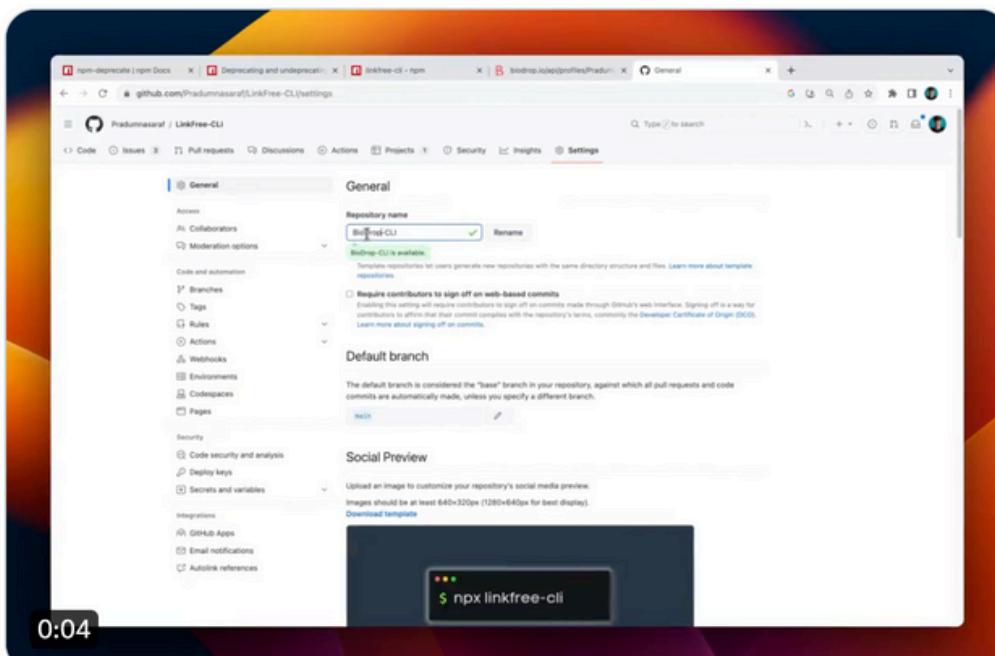

Check the Actions section in my DevOps repo, and you will find everything from notes to resources.

Pradumna Saraf @pradumna_saraf · Sep 12, 2023

LinkFree CLI is now BioDrop CLI 🎉

Resources

Open Source With Pradumna

Starred 820

The image shows two screenshots of a GitHub repository. The left screenshot displays the main repository page with the README.md file open. The README features a logo, links to the repository's website and Twitter, and a quote: "Building the repo you need to get started with Open Source". It also includes sections for Repo Navigation, Languages (HTML 81.5%, CSS 16.6%, Dockerfile 1.9%), and a Table of Pages. The right screenshot shows a detailed view of the Table of Pages, which lists several sections with descriptions and 'OPEN' buttons:

Section/pages	Description	Page (Link-clickable)
15 DAYS OF OPEN SOURCE (BOOTCAMP)	Contains 15 days of Twitter threads and blogs that I posted during the Bootcamp.	OPEN
HOW TO?	Contains step by step guide (Written + Screenshots + Video) on how to create an Issue, cloning/forking a repo, creating a Pull Request etc.	OPEN
LEARNING RESOURCES	Other Resources like videos, blogs and images to learn Open Source, Git and Github.	OPEN
BEGINNER FRIENDLY/FIRST TIMERS PROJECTS	Contains repo link for beginner friendly projects.	OPEN
REGULAR CONTENT (TWEETS, POST)	Informational content that I and other community people post.	OPEN

github.com/Pradumnasaraf/open-source-with-pradumna

Open Source With Pradumna

The screenshot shows the GitHub repository page for 'OPEN SOURCE WITH PRADUMNA'. It features a dark theme with a white logo icon (a stylized 'Q') and the text 'OPEN SOURCE WITH PRADUMNA'. Below the logo, it says 'os.pradumnasaraf.dev' and provides links to Twitter (@pradumna_saraf) and GitHub (@Pradumnasaraf). A quote at the bottom reads: "Building the repo you need to get started with Open Source". The 'Repo Navigation' section explains the structure of the repository, mentioning 'Pages' for better structuring and easier learning. It also notes that there are separate pages for Resources and Bootcamp. Below this, it states: 'This repo is hosted at os.pradumnasaraf.dev' and includes a 'Open in Gitpod' button. At the bottom, it says 'Follow @Pradumna_saraf on Twitter to learn more about it.' and includes a 'Table of Pages' link.

The screenshot shows the GitHub repository page for 'OPEN SOURCE WITH PRADUMNA' with a 'Table of Pages' structure. The table has three columns: 'Section/pages', 'Description', and 'Page (Link-clickable)'. The rows include:

Section/pages	Description	Page (Link-clickable)
15 DAYS OF OPEN SOURCE (BOOTCAMP)	Contains 15 days of Twitter threads and blogs that I posted during the Bootcamp.	OPEN
HOW TO?	Contains step by step guide (Written + Screenshots + Video) on how to create an issue, cloning/forking a repo, creating a Pull Request etc.	OPEN
