Can ChatGPT check today’s exact flight delay right now?

Can Perplexity create an issue for me on GitHub?

No....unless they have access

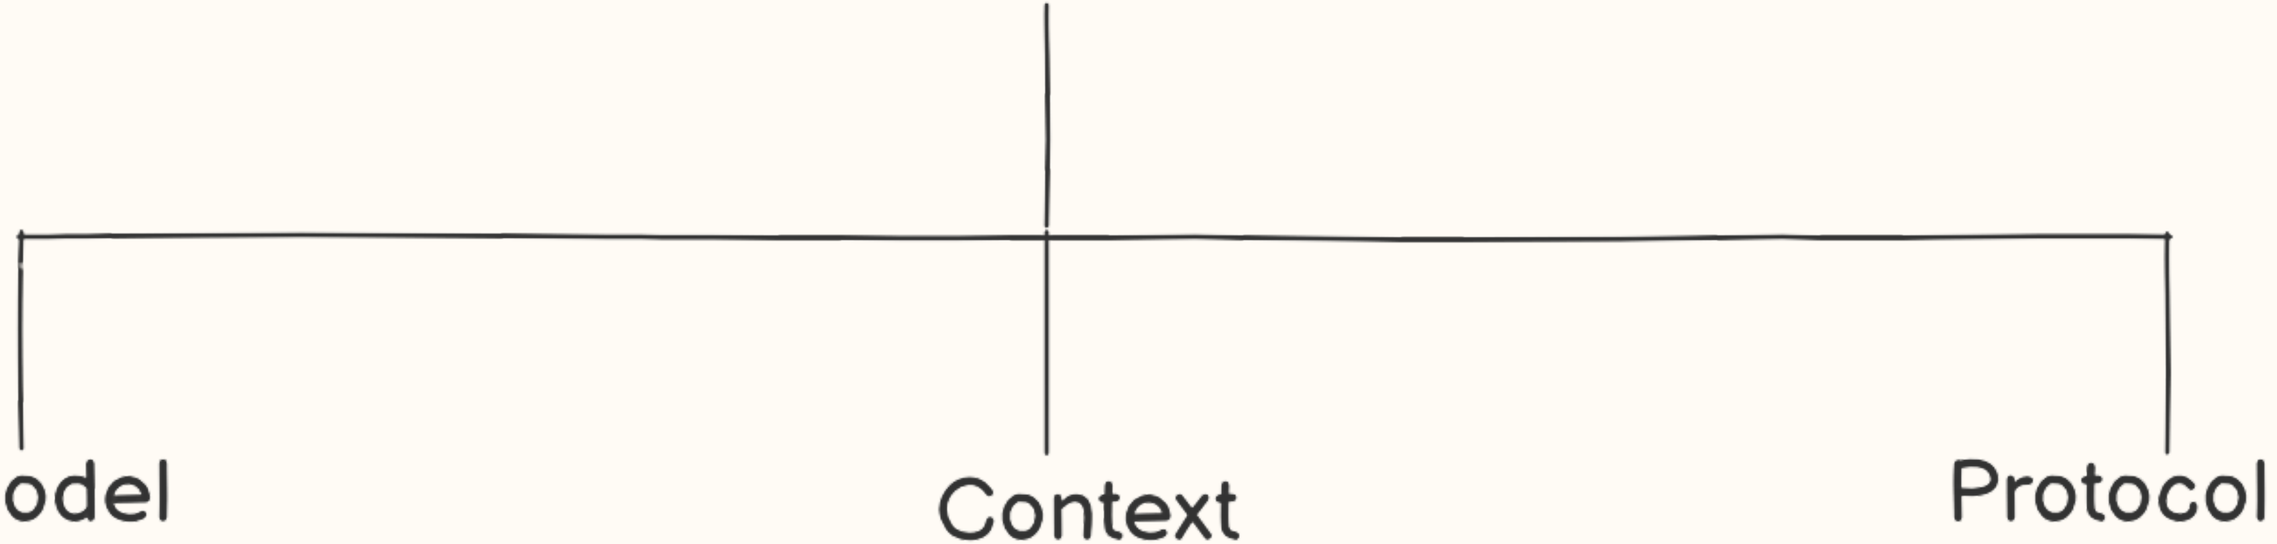

MCP

Model Context Protocol

MCP

Model Context Protocol (MCP)

Model

Model Context Protocol (MCP) Architecture

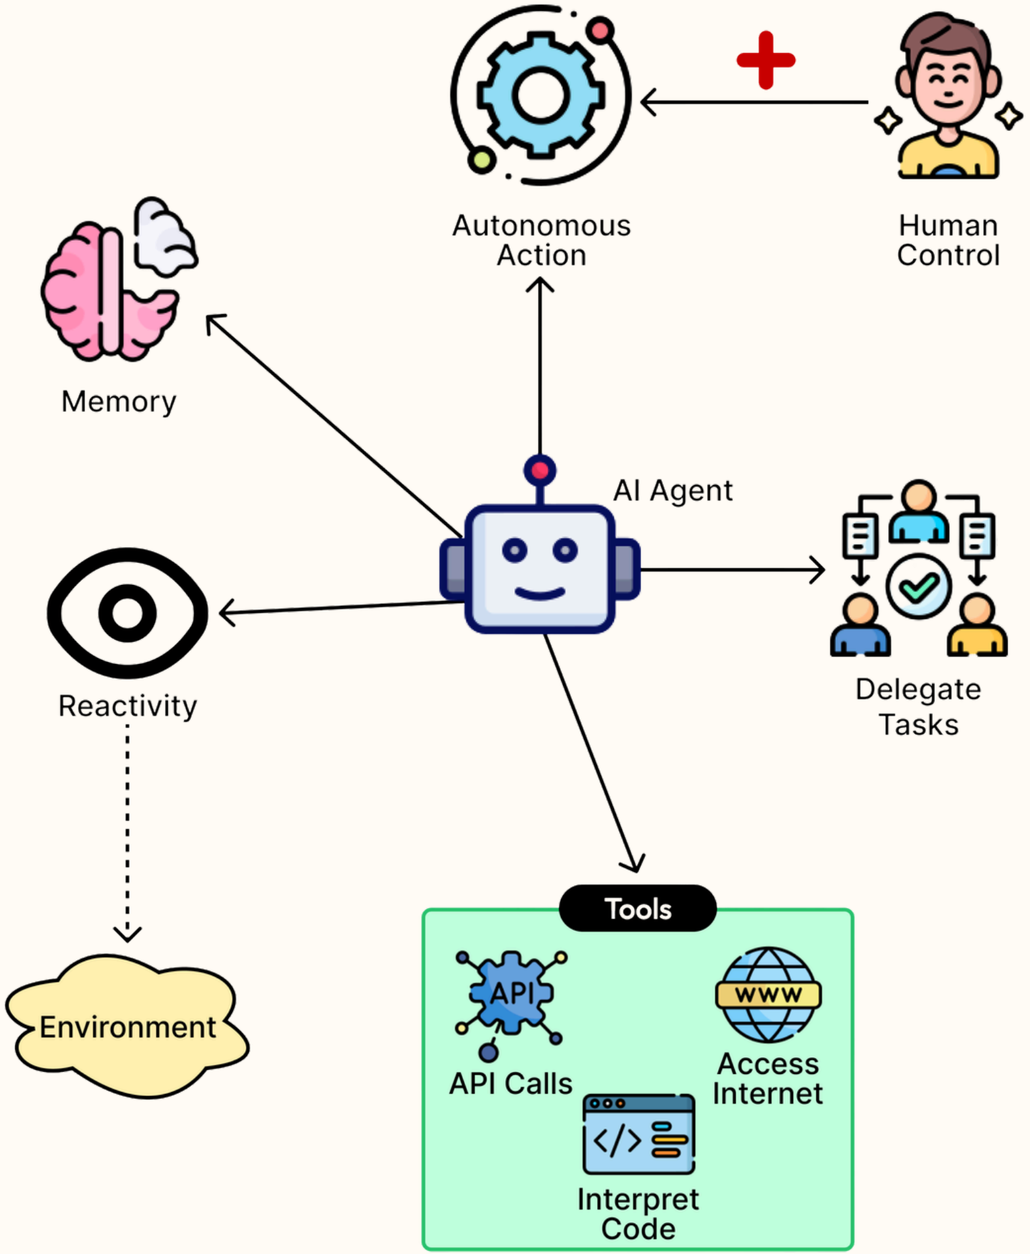

Demo

LLM gives intelligence.
MCP gives access.

Agents

Can ChatGPT monitor a flight every 10 minutes and alert me if it’s delayed?

Can Perplexity find a bug in my code and open a detailed GitHub issue?

Autonomous Action
Human Control
Memory
AI Agent
Reactivity
Delegate Tasks
Environment
Tools
API
API Calls
WWW
Access Internet
Interpret Code

Goal

↓

Think (use **brain**)

↓

Act (use **tool**)

↓

Observe result (**memory**)

↓

Decide on the next step

↓

Repeat (**loop**)

Demo

LLM gives intelligence.
MCP gives access.
Agents give autonomy.

Thank You!
